

Andrew Pan

memelord extreme

education

2019–present **B.A. in Computer Science**, *University of Minnesota*, 3.756 GPA.
Currently a **sophomore** at the University of Minnesota, expected graduation **Spring 2022**.

selected CSCI coursework

- o CSCI2021, Machine Architecture and Organization
- o CSCI2041, Advanced Programming Principles
- o CSCI2033, Elementary Computational Linear Algebra
- o CSCI5551, Introduction to Intelligent Robotic Systems (in-progress)
- o CSCI4611, Programming Interactive Computer Graphics and Games (in-progress)

extracurriculars

ACM UMN Officer (webmaster) for ACM UMN, the local chapter of the Association for Computing Machinery.
2020–present

UMN SVP Member of the Controls subteam on the U of M Solar Vehicle Project. Worked on design of the rearview system and integrated USB support for the telemetry system.
2019–present

FTC Programmer for First Tech Challenge teams 5199 and 6200. The First Tech Challenge is a global robotics competition for students in middle and high school. Implemented computer vision algorithms for autonomous robot operation (OpenCV), running on an Android-based robotics platform. Took Team 5199 to the world championship.
2016–2019

skillset

individual categories ordered by exposure, most to least.

web	REST, PHP, node, HTML/JS	sysadmin	(ba fi)sh, awk, misc. unix tooling, docker
systems	RE (mobile and desktop apps), go, c/pp, ARM asm	mobile	java, android app dev.

personal projects and contributions

[tpl-c900-openwrt-install](#) 

keywords reverse engineering, unix tooling, lua, go

description Broke firmware verification scheme on the TP-Link Archer C900, a consumer router. Installed alternative open source router firmware (OpenWRT). Documented process for others to follow.
